

How to Access USGS Topo Maps

Due to the difficulty in finding US Topo maps, below you will find instructions to help you navigate the USGS topoView tool and successfully download the topographic maps you need.

- 1 Go to **<https://ngmdb.usgs.gov/topoview>**
- 2 Click "**Get Maps**"
- 3 Zoom in to your area of interest
- 4 Click "**24K**" on the top right
- 5 Click on the map. It should show you a list of available maps at that location. Look for the most current "**US Topo**"
- 6 Click on the map name you want in the list
- 7 Click on "**GeoPDF**"
- 8 The download should occur automatically

Note: For some browsers like Chrome, a blank screen may appear but the download is still in progress. Check your download folder or the download icon in the upper right corner of the browser.

These instructions provide access to official USGS topographic maps with US National Grid coordinates.
